

2022 Consumer Confidence Report

News Release Date

04-26-2023

From Missouri DNR: Each year, by July 1, community water supplies are required to make Consumer Confidence Reports available to their customers. These reports enable Missourians to make knowledgeable decisions about their health and their environment and provide consumers with the following information:

- The lake, river, aquifer, or other source of the drinking water.
- A brief summary of the susceptibility to contamination of the local drinking water source, based on the source water assessments.
- How to get a copy of the water system's complete source water assessment;
- The level, or range of levels, of any contaminant found in local drinking water, as well as the federal health-based standard (maximum contaminant level) for comparison.
- The likely source of any contaminant in the local drinking water supply.
- Potential health effects of any contaminant detected in violation of health standards, and an accounting of the system's actions to restore safe drinking water.
- The water system's compliance with other drinking water-related rules.
- Educational information on nitrate, arsenic, or lead in areas where these contaminants are detected above 50 percent of federal standards.
- Phone numbers for additional sources of information.

Consumer Confidence Reports are updated annually by April 1.

The CCR for the City of Centralia is provided below and is also available through the following link: <https://dnrservices.mo.gov/ccr/MO3010152.pdf> . Please contact City Hall at (573) 682-2139 to obtain a printed copy of the report.
